

System Server, Standard

for Complex Parking Systems

Your Success is Our Goal

SIEMENS

Industrial Solutions and Services

SIPARK PMA DBS 120 Standard is a highly developed solution for controlling, monitoring and administering complex parking systems. The application of the MS SQL database enables the storage and processing of large amounts of data. The consistent application of the Ethernet standard enables extensive networking and access possibilities. The system server provides the car park operator with a cutting-edge medium for complete parking area management.

- designed for systems with more than
- 25 devices
- high-quality brand name PC with Intel® Pentium® 4 processor, 4 GB RAM
- software licence MS Windows 2003 Server
- software licence MS SQL Server Standard
