

Flip head over heels
in love with TicketManager™

Work Smarter with Real-Time Solutions

TicketManager™ is the world's leading, real-time handheld enforcement system. A revolutionary platform, Aparc's TicketManager™ streamlines enforcement operations for enhanced performance. Completely flexible, our open source software can be tailored and configured specifically for your needs, providing a turn-key solution for your parking, policing, bylaw, fire and safety, cashiering, or security operation.

Fully-integrated with SIEMENS' extensive portfolio of parking systems, TicketManager™ has a dynamic parking application that extends beyond citations. Our integrated solution enables your Parking Enforcement Officers to target vehicles quickly and easily using payment information from SIEMENS' superior Pay-by-Space and Pay-by-License Plate pay-stations.

The results are impressive! Enforcement officers can target vehicles quickly, perform real-time vehicle lookups and prepare violations on the fly using our automated citation system.

TicketManager™

Features and Benefits:

- ✓ Replaces paper-based and batch systems
- ✓ Real-time wireless communications and ticket processing
- ✓ Over 10 million citations issued annually
